McGill Is Worldwide!!

Since the advent of the famous town of McGill to the present day, the parents have told their kids to go elsewhere as the copper ore could run out any day. So most of the kids did just that. Some left for college and found a life in various places around the US and the world. Others made a life long career of the military. And many others found better or more interesting jobs around the globe.

The one major factor in all this, is that where ever they went, they excelled.

There have been so many, but I can recall some that I knew or am familiar with. Most are of my generation or right before or right after. I wish I knew more.

The Military

Bob Spane - Annapolis graduate, carrier pilot, Captain of the Nuclear Carrier, Enterprise, advanced to 3 Star Admiral.

John Carlson, West Point, President of a major construction firm.

Jack Schroeder, West Pint, US Air Force fighter pilot, Colonel.

Coleen Draper, US Marine Corp, Secretary at the Pentagon.

Royce Seely, US Air Force fighter pilot, Colonel

Paul Gibson, US Air Force, Top Sargent radar site in Northern Japanese Islands

These and many others served our country. You can check out the McGillites that served in WWII at the McGill Club.

Government and Law

Andy Demetra, Law School, was in the battle of “A Bridge Too Far”.

Janene Assuras, Secretary for two Nevada US Senators in DC.

This is a tiny smattering of the talent that McGill raised and sent out into the big world.

I hope that some day, someone can list them all. They all deserve to be remembered.

McGill News

This past 4th of July, I had the distinct Honor of being a Grand Marshal of the Parade. I want to thank those that nominated me and those that voted for me. It is one of those rare things in life that mean a lot and are never forgotten.
