Keith's Corner/McGill News

April 28, 2025

What Replaced This Corner ?

It was hard to figure this one out, until you look at the top of the building on the corner. There is a painting of the proposed Hotel Nevada.

I have several photos of downtown Ely such as the next two.

The round corner of the Northern Hotel is obvious.

These show the old Northern Hotel on the corner just one block away from the Hotel Nevada.

I enlarged the photo but could not make out any of the buildings where the Hotel Nevada was to be built.

If anyone has any better photos of the downtown area of Ely in the olden days please let me know.

Most of my photos of downtown Ely were taken from the west end of Aultman. I don't know why that is. I guess it was the most likely way to do it.

The Northern was built about 10 years before the Nevada. The downtown area of Ely had so many changes in the early years. I just hope that someone is able to reconstruct the changes, especially with photos. It is a shame to not have this done.

I have done such a thing with the main street of McGill. I have most of the possible photos, but I am sure there are more. If so, I would like to see them.

Old Photo

This not the best photo. I cleaned it up as much as possible. It was taken down behind the big Nevada Northern Depot. I don't know what year it was taken.

Anybody have a good guess??
